[Docket No. 960828232-6232-01]
RIN 0651-AA90

Recordal Fees Associated with the Fastener Quality Act

Agency: Patent and Trademark Office, Commerce.
Action: Notice of Proposed Rulemaking.
Summary: The Patent and Trademark Office (PTO) is proposing to establish fees associated with recordation of insignias of manufacturers and private label distributors to ensure the traceability of a fastener to its manufacturer or private label distributor. This proposal is in accordance with provisions of the Fastener Quality Act (Public Law 101-592, as amended by Public Law 104-113).
Dates: Written comments must be submitted on or before October 17, 1996. No meeting will be held.
Addresses: Address written comments to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, Attention: Lizbeth Kulick, Office of the Assistant Commissioner for Trademarks, 2900 Crystal Drive, Arlington, Va. 22202-3513 or by fax to (703) 308-7220.
For Further Information Contact: Lizbeth Kulick by telephone at (703) 308-8900, or by fax at (703) 308-7220, or by mail marked to her attention and addressed to the Assistant Commissioner for Trademarks, 2900 Crystal Drive, Arlington, Va. 22202-3513.

Supplementary Information

The Department of Commerce issued a notice of proposed rulemaking to implement the Fastener Quality Act. 57 FR 37032, Aug. 17, 1992. Under that notice, the task of recording fastener insignia was assigned to the PTO. 57 FR 37033-35, Aug. 17, 1992. That notice provided for recovery of insignia costs through user fees. 57 FR 37035-36, Aug. 17, 1992. The

PTO proposes three twenty-dollar fees to recover its costs associated with the insignia recordation program.

Cost Calculations

The cost of processing an application for recordal of an insignia is as follows:

Compensation and Benefits	1,000
Hardware and Software Costs	4,500
Subtotal	5,500
General and Administrative Overhead @ 17%	950
Total Costs	6,450
Estimated Workload	300
Fee Amount	21.50
Rounded Fee	**$20**

Two rules, 37 CFR §§ 2.53 and 2.189, are being removed because they are not necessary. Section 2.53 specifies the manner in which drawings must be transmitted. Section 2.189 simply states the Office's policy on publishing amendments to the rules. The policy is not changing, but does not have to be stated as a rule.

Other Considerations

It has determined that this rule is not significant for the purposes of Executive Order 12866. The information collections required by this proposed rule are pending approval before the Office of Management and Budget (OMB number 0651-0028). The affected public would be manufacturers and private label distributors of certain types of industrial fasteners. The estimated average number of responses is six hundred. The estimated time per response is ten minutes, so the estimated total annual burden is one hundred hours. The collected information is needed to ensure that a fastener can be traced to its manufacturer or private label distributor.

This proposed fee does not require notice and comment under 5 U.S.C. 553 or any other statute, so no analysis or certification is required under 5 U.S.C. 603(a).

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
